AcroAlliance 2024:
A recap

A year of hard work

As 2025 just started, we reflect on the last year and all the achievements and experiences we had. This year, we were witnesses of a continuous growth in interest and actions to advance the cultivation and value chain development of the macaúba palm (*Acrocomia aculeata*), realizing its potential as a valuable alternative oil crop and source of different biobased resources for the bioeconomy. We, at the AcroAlliance team, look forward to continuing the hard work and aim towards the new year with the project's conclusion. Here's to a 2025 full of learning, knowledge sharing, and discoveries towards a more sustainable world.

-AcroAlliance team.

Feliz ano novo!

Frohes neues Jahr!

Happy new year!

Events

Science often unfolds behind closed doors - in labs, research centers, and other facilities. However, when a breakthrough emerges from the dedicated efforts of our team, it's time to share those findings with the scientific community, colleagues and the world. That's why we actively participate in as many events as possible. Last year was no exception, here are some of the key events we took part in:

a

b

c

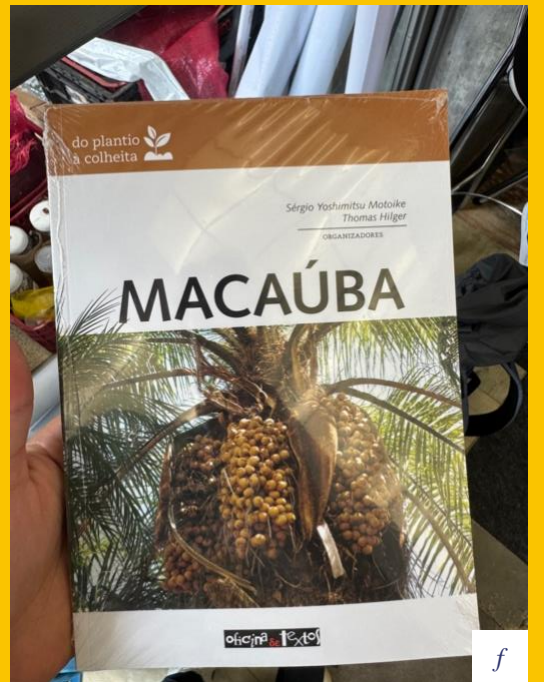

d

e

g

f

h

- a. *AcroAlliance Team at the German - Brazilian Symposium for Sustainable Deveelopment in Tübingen, March 2024.*
- b. *GFE team at the Uni Hohenheim „Tag der offenen Tür“, July 2024.*
- c. *AcroAlliance stand at the Macaúba Congess in Campinas, October 2024.*
- d. *Lively disccussions of AcroAlliance results at the Macaúba Congress.*
- e. *AcroAlliance workshop in Campinas, October 2024.*
- f. *Newly released Macauba Book. A state-of-the-art Macauba resource.*
- g. *Macauba booklet by UFV.*
- h. *WaNuLCAS model workshop at UFV in Viçosa, October 2024.*

Whats next for 2025?

As the project approaches its last year, the stakes are high, and the final activities are drawing near. Despite this being the last year of the project, the AcroAlliance consortium has an exciting lineup of planned events and activities, including field visits in Germany, congresses, workshops, and more! We remain committed to working diligently as we move toward the project's completion.
